

GLASS DOORS

Bi-fold Doors are designed for easy opening and closure in extremely tight spaces. They're available for both Superior wood-burning and B-vent gas-burning fireplaces in various sizes, finishes and distinctive door handle treatments.

Twin Pane doors are designed to provide a virtually unbroken view of the fire thanks to an elegant design that features two large metal trimmed glass panes. They're also available for Superior wood-burning and B-vent gas-burning fireplaces in several sizes, finishes and distinctive door handle treatments.

Fixed Panel choices are available for select Superior radiant and heat-circulating B-vent gas fireplaces. Whether you choose black or brass trim, their handsome "door handles" and separate glass panels help create the look of bi-fold glass doors.

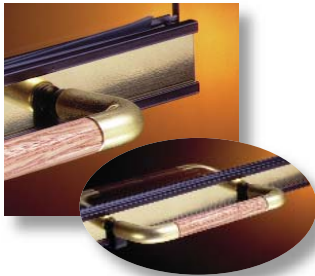

** One open door shown for demonstration only. When used, both doors must either be fully closed or fully open.*
